<b>Remuneration</b>	: Per day @ BDT 89,737, total 2 days=2x89737=179,474
<b>Mode of Payment</b>	: 1 installment after completion of the review

#### Introduction:

Save the Children in Bangladesh is currently in the process of designing a food security and livelihoods program for DFAP. The program will have a strong focus on haors and coastal districts and as such, one of its major components is climate change and resilience. The FSL team seeks to hire a senior consultant to provide technical expertise in reviewing and strengthening the proposal and making it more competitive.

#### Purpose of the Work:

1. Reviewing DFAP proposal from a climate specific lens and contributing to the SCI's understanding of climate change issues in the program's target areas
2. Taking stock and including commentary of existing GoB policies relating to climate change in the proposal
3. Contributing to and if needed, rewriting the climate change adaptation and environmental compliance section (within the design section) – referencing important government policies or who the program will need to coordinate with
4. Providing technical assistance in demonstrating that proposed program interventions fit into existing government strategies and activities
5. Making suggestions as to specific activities or nuances that SCI should highlight within the framework
6. Reviewing the Environmental Safeguards Plan. Adding language as specific policies, regulations of which SCI needs to be aware of and how SCI needs to coordinate with the government on its strategy
7. Providing any recommendations on special studies or assessments that should be included in the program
8. Providing any specific highlights or points that need to be considered within the proposal given the two different livelihood zones

#### Deliverables:

- Modified section on Climate Change Adaptation (CCA) in the DFAP proposal
